FINANCIAL AND COMMERCIAL.

The firmness of the premium in gold is due to the advance of the Bank of England rate, and the decline in bonds at London to 79% consequent thereon. The Treasury sale of \$1.000,000 coin, yesterday morning perhaps tended to modify the effect which the unexpecied change in the bank rate would other-wise have produced. In Wall street money nas an easier appearance, though still generally 7 per cent. on call loans.
